

## PARSOL®

Body tinted transparency

## PARSOL®

Body tinted transparency

PARSOL® is a clear-float glass that is dyed in mass and is available in different colours. PARSOL® is a body-tinted glass made in the same way as transparent float glass PLANILUX® is. The float process delivers perfectly flat and parallel surfaces to the glass.

### Benefits

- **Consistency in colour**
- **Multitude of possible applications**
- **Improved properties using the product in laminated /tempered / IGU versions**

### Applications

When an attractive appearance is needed, PARSOL® gives colour to space.

PARSOL®, like PLANILUX®, is designed for universal applications where an attractive aesthetics is required:

- Interior decoration, fitting and furnishing applications.
- External uses of single or insulated glass units for facades and overhead glazing.

#### 1 Aesthetics

The colours of PARSOL® glass are achieved by adding metal oxides during the float glass process. This fulfills design and colour requirements for windows and facades.

#### 2 Combinations

PARSOL® can be processed into and insulated glass unit (IGU), toughened safety glass, laminated glass for safety, sound insulation, injury and/or burglary protection.

#### 3 Visual comfort

PARSOL® helps providing visual comfort.

## Availability

### STANDARD THICKNESSES AND DIMENSIONS

- PARSOL® GREY

THICKNESS	DIMENSIONS (mm)
3.3 mm	3660 x 2200
4 mm	3300 x 2400
5 mm	3300 x 2400 3660 x 2200
6 mm	3300 x 2400 3660 x 2200
8 mm	3660 x 2600
10 mm	3660 x 2600

- PARSOL® GREEN

THICKNESS	DIMENSIONS (mm)
3.15 mm	3210 x 2400
4 mm	3210 x 2400
5 mm	3210 x 2400
6 mm	3210 x 2400
10 mm	3210 x 2400

Other thicknesses and dimensions: Please contact the sales team

## Processing

With PARSOL® the design options and instructions are the same as PLANILUX® clear float glass. PARSOL® can require heat treatment to avoid the risk of thermal breakage, depending on the application or location.

- Tempered
- Laminated
- Curved
- Enameled and screen printed
- Used in double glazing
